Remarks

For installation in metal: Observe clear zone.

a) Hygroscopicity The hygroscopicity of the cured material depends heavily on the ambient temperature. Saturation in water at +20 °C / 6 days = 0.3 %

Saturation in water at +70 °C / 3 days = 3.0 %

Torsional, bending and impact loading is not permitted.

Time specification includes data check.

For installation requirements see corresponding read/write head.

Only when used together with the appropriate read/write head.

Values are under rated conditions unless otherwise specified.
