

Basic features

| | |
|--------------------------|--|
| Scope of delivery | Beam deflector |
| Use | for photoelectric sensors BOS 18M for photoelectric sensors BOS 18K |
| Version | 90° lens, 1 open mirror |

Material

| | |
|---------------------------------|---------------------|
| Housing material | Aluminium, Anodized |
| Material sensing surface | PET, coated Al |
| Surface protection | Anodized |

Mechanical data

| | |
|------------------------|-----------------|
| Dimension | 22 x 42 x 30 mm |
| Mounting part | Nut M18x1 |
| Sensing surface | Mirror surface |

Remarks

Beam deflector reduces range.
 For sensors with dual axis optics ensure correct orientation of the reflective surface to the plane of the optical axes.
