Remarks

We recommend to connect the teach line to the negative lead (L-) when not in use.
Values referenced to axial approach of St 37 target. For other materials correction factors are applied.
The working range can be taught using the Teach line or the BAE PD-AW-009-S04 programmer (order code BAE00MN).
Scattering (e.g. due to manufacturing tolerances) is described by the tolerance T at Se. This can be approximated using the formula: T = (slmax + slmin) / 20 = ± xx mm.
UL-MARKINGS: - For use in NFPA 79 Applications only - Adapters providing field wiring means are available from the manufacturer. Refer to manufacturers information.
For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
