

Basic features

Scope of delivery	Beam deflector
Use	for photoelectric sensors BOS 18M for photoelectric sensors BOS 18K
Version	90° lens, 1 open mirror

Material

Housing material	Aluminium, Anodized
Material sensing surface	PET, coated Al
Surface protection	Anodized

Mechanical data

Dimension	22 x 42 x 30 mm
Mounting part	Nut M18x1
Sensing surface	Mirror surface

Remarks

Beam deflector reduces range.
 For sensors with dual axis optics ensure correct orientation of the reflective surface to the plane of the optical axes.
